

This is a three column graph. After you print it off, glue it onto a 12x18 piece of construction paper. Extend the center lines down. Then I laminate mine. Now you can write on it with a dry erase marker. Prepare carrots. Conduct your taste test. Record the children's responses on the chart. Tally the responses. After all the kids have responded, I write a 'blank' statement at the bottom...like - Most of us like to eat our carrots raw best.

Glue paper down here...
